

MASTERS FINAL ORAL EXAMINATION

**Tuesday, November 15th
10:00a.m. @ 216 Atanasoff**

Arvind Ranganathan

Major Professors: Samik Basu and Anuj Sharma

Traffic Events Database

This is a project that develops a solution to manage traffic events for the Intrans department. The solution eliminates the current manual process that uses excel sheets and windows directory. The solution consists of a website and a standalone application. The application is used to upload the traffic event videos into the system, and the website is used to query and tag them.
